

Passed Test Cases for Database

failDatabaseConstructor output:

— DEFAULT CONSTRUCTOR PASSED —

failCopyConstructor() output:

— DEFAULT COPY CONSTRUCTOR PASSED —

failAddTable output:

— ADD TABLE PASSED —

failDropTable output

— DROP TABLE PASSED —

failListTable

— LIST TABLE PASSED —

failGetTable

— GET TABLE PASSED —

failQuery== adjusted so query_command takes test cases properly

— QUERY PASSED —

— ALL TESTS PASSED —

Passed Test Cases for Record:

failDefaultConstructor == passed

failSizeConstructor == passed

failcopyConstructor == passed

failSize == passed

failGet == passed

failSet == passed

testRecord == ALL TEST PASSED

testTableConstructor == passed

testTableCopyConstructor == passed

testTableConstructorSize == passed

testTableConstructorAttributeVector == passed after changing attributeVector to be vector of Attribute where attribute is a string

testTableAddAttribute == passed

testTableDeleteAttribute == passed

testTableGetSize == passed

testTableSpecifyKey == passed

testTableComputeCount == passed

testTableComputeMin == passed

testTableComputeMax() == passed

testTableAdd == passed

testTableCrossJoin== passed

testTableNaturalJoin == passed after removing try-catch framework

PLEASE USE NAMESPACES DB AND DB::PARSER WHEN TESTING.
